Prime Supplements – Limited Edition 2026

Label / hang-tag data for production · issued 9 November 2026 · primesupplements.ro

What we need from you. One card per garment, placed inside the polybag, with the following three elements and nothing else that is mandatory:

- **Product title** – exactly as written below, in Romanian (keep the diacritics ț, ă, ș).
- **Size** – S, M, L, XL, XXL, 3XL or 4XL.
- **EAN-13 barcode** with its 13 digits printed underneath – one code per size, see the tables.

The card design (layout, colours, material, logo placement) is yours to create. The barcode files are supplied in this package in two formats: **PNG at 300 dpi** (folder *barcodes-png*) and **SVG vector** (folder *barcodes-svg*). The same data is in *ean-codes.csv*.

Hoodie – Limited Edition 2026

Product title to print on the card (Romanian):

Hanorac Prime Ediție Limitată 2026

Size	EAN-13 (also used as SKU)	Barcode (file name = PRODUCT-SIZE-EAN)

4XL	**4002026200071**	 PANTS-4XL-4002026200071.png

Barcode printing requirements

- Print the barcode **black on white** (or on a very light matte background). No colours, no reversed (white-on-dark) printing, no gloss over the code.
- Do not redraw or re-type the codes; use the supplied files. If you need to resize, scale proportionally – never stretch only one direction.
- Minimum size: **80 % of nominal** (bars area at least 29.8 mm wide, bar height at least 18.3 mm). The SVG files are at 100 % nominal size (37.29 × 25.93 mm including quiet zones).
- Keep the **quiet zones** (the white space left and right of the bars) free: at least 3.6 mm on the left and 2.3 mm on the right at 100 %.
- Keep the **13 digits readable** under the bars – they are the backup if the scanner fails.
- Please send us a proof (PDF or photo) of one card per product before printing the whole run, so we can test-scan it.
